

Data Centre Audit

An independent assessment of your most important ICT asset

As one of the leading data centre designers and planners in Australia, Strategic Directions will conduct a high level audit of your data centre facility, completely free of vendor influences.

A modern data centre is core infrastructure for a dynamic and profitable business, with most organisations relying heavily on immediate access to information.

For an average of \$6000 (depending on the size of the facility) – we will review all operational aspects of your data centre operation, including:

Overall design, layout and level of redundancy

Power reticulation

Cooling systems

Backup systems including generators, UPS

Batteries etc

Rack and cabling models

General operational techniques and practices

Performance monitoring and reporting

Our highly qualified Consultant will provide you with a Report that will identify how your Data Centre measures up and whether there are any significant risks around the present configuration.

We will also identify any immediate opportunities for improvements, and recommended actions moving forward. Our Company's broad experience over a number of data centre engagements large and small will enable us to provide you with accurate feedback about the health of your centre.
